Hover the right lightstamps

This interactive media project is inspired by the Vietnamese song “Cơn Mưa Hạ” (Summer Rain) by Trúc Hồ. The project contains six interactive pages, each representing different lyrics, emotions, and scenes from the song.

Users can click and interact with objects on each page to explore the story and atmosphere of the music. Through visuals, sound, and interaction, the project aims to create an emotional and immersive experience for the audience.

Lips meet in
a kiss,
shivering in
the deep
night,

Turning into
streams of
tears,
turning into
the coming
storm.

Love calling
to love, in
an embrace
so sudden it
startles.

Click to see tips

Drag mouse in the correct order lyrics

If correct: the last scene will automatically after click: "OK"
If incorrect: the lyric letters are shaking + lightning strokes.

Does the
music call
the rain, or
does the rain
pour down
upon life?

And from
that
moment, I
can feel it
within me

Each drop of
rain falls
softly like
the sound of
a lute,

Love, like a
fleeting
breeze,
carries us into
passion's hold.

A heart
renewed, as
the summer
rain arrives
in the dead
of night.

Some memories stay. Some fade like rain
But every trace shaped who we are!
